DETAILED ACTION

Supplemental Notice of Allowance

1. The last four lines of the description of the Examiner's Amendment were extraneous template entries inconsistent with the marked up amendment sent to the printer. Those lines have been deleted and a new Examiner's amendment description documenting only the changes made is made of record in this supplemental notice of allowance.

Information Disclosure Statement

2. A one page abstract only appears in the Non-patent literature document of the IDS Identified by publication number 10072117 to Ishikawajima Harima Heavy Industries. This was originally not considered as no complete document was supplied nor found within the file wrapper, nor was a statement of relevance supplied for a foreign language document, nor was a number matching that publication number available through the US or JPO databases, it was originally not considered

However, applicant expressly wished to have only the published abstract considered, not the whole document and had placed it in the non-patent literature portion of the IDS rather than the foreign patent section to reflect an incomplete document is present.

As publication normally presents such documents as complete documents inspite of other labeling on the IDS, to minimize the risk that an incomplete patent document was presented for consideration without the full document considered, the notation "incomplete document abstract only" was placed on the IDS and the word "Patent" was struck from the 1449.

As nothing within the two paragraph abstract suggests the device is suitable for use in a radiation environment.
